Career Objective

Aspiring Java and Full Stack Developer seeking an opportunity to apply my programming skills, build efficient web applications, and continuously enhance my technical knowledge while contributing to organizational success.

Education

B.E. Computer Science and Engineering Sri Shakthi Institute of Engineering and Technology	Pursuing CGPA: 7.96*
Higher Secondary Certificate (HSC) Government Higher Secondary School,kethanur	2023 80%

Skills

Programming: Java, C,
Frontend: React, HTML, CSS, JavaScript
Backend: Node.js, Express.js
Database: MySQL, MongoDB
Core Concepts: Object-Oriented Programming (OOP), Data Structures
Soft Skills: Communication, Team Collaboration, Problem Solving, Quick Learner, Time Management
Languages: English, Tamil (Read, Write, Speak)

Certifications

NPTEL — Programming in Java	JAN-APR - 2025
Completed certification covering core Java concepts including OOP, exception handling, collections, multithreading, and weekly hands-on programming tasks.	

Internship

ARTTIFAI TECH Library Management System — Full Stack Development	JUL (14-21), 2025
Developed a library management system that helps manage books, users, and borrowing records efficiently. The application supports book issue and return operations while maintaining organized data and reducing manual work.	

Projects

Sports Store — MERN Stack / React, Node.js, Express, Razorpay, MongoDB	FEB – 2025
Developed a full-stack sports store application that enables users to browse products, manage carts, complete secure online payments, and efficiently process orders through a user-friendly interface.	
Inventory Management System / Java (Console Application)	FEB – 2026
Developed a console-based inventory management system using Java and Object-Oriented Programming (OOP) to manage product records, stock updates, billing operations, purchase bill generation, and data validation, ensuring accurate calculations and efficient inventory management.	

Area of Interest

Full Stack Development: Building web applications using frontend and backend technologies.
SQL: Writing efficient queries for data retrieval, database management, and CRUD operations.
Web Development: Creating responsive and user-friendly websites with modern technologies.
